

PRESS RELEASE

Crewsaver Evolution 250N Lifejacket entered into the Sea Work Innovation showcase.

We have great pleasure in announcing that we will be entering the Crewsaver Evolution 250N lifejacket into this year's Innovation Awards at Seawork International – the largest and fastest growing commercial marine and workboat event, which commences June 10th. Statistics show more than 80% of all visitors attend Seawork specifically to see new products and vessels. The Seawork Innovations Showcase is situated in a prominent, high-traffic area of the exhibition. Its purpose is to provide visitors with a fast-track route to stands and berths of interest and a "shop window" for the latest in new technology and innovation. Products entered into the showcase have a dedicated area on the Seawork website, coverage in the Seawork newsletters and e-newsletters plus a feature in Maritime Journal.

The Evolution 250N is a hybrid, general purpose, waistcoat style lifejacket designed for working in an environment where frequent water immersion is probable. Moving on from our traditional lifejacket, the Harvester, the Evolution 250N is a more modern design that gives you additional buoyancy, comfort and manoeuvrability.

Constructed with 60N of inherently buoyant foam, a 190N quick turn inflation chamber provides you with all the benefits of a buoyancy aid coupled with the increased safety of a lifejacket.

The Evolution 250N is available in Manual or Automatic inflation option. With the Manual version you can enter and work safely in the water ready-buoyed with 60N of foam and with the option to inflate the lifejacket if required. With the Automatic operation, should you fall into the water, the Evolution 250N inflates automatically to ensure your safety. Both models are single chamber jackets that use a 38g CO2 cylinder. This can be removed from the jacket for service and repair as required.

Open side panels promote air circulation for your comfort and the jacket closes with a front zip, waist belt and front buckle. You can easily adjust how the jacket sits and prevent it riding up with the adjusters provided.

The Evolution 250N will be on full display throughout the show on Survitec stand B137.
