Seawork: Stand PB67

Survitec Group launches the pioneering Crewsaver Workvest lifejacket range, including the Crewfit XD lifejacket providing the ultimate in comfort, performance & buying flexibility

Survitec Group is delighted to launch its pioneering Crewsaver single chamber Workvest range, ideal for the working marine market, at Seawork 14-16th June 2016.

This new range uses the technology and expertise gained by Survitec Group through its work in the design and manufacture of lifejackets for the marine and aviation markets, to create a product range for the working marine market which offers the most advanced comfort and performance technologies to date.

Feedback has shown that many operators are finding their current lifejackets too uncomfortable to wear for periods of time, using Fusion 3D technology Crewsaver now offers companies the opportunity to purchase 3D designed lifejackets, greatly increasing the users comfort over long and continued use.

Bladder design is integral to Crewsaver lifejackets and additionally all Crewsaver lifejackets now come with a unique chin support, helping to keep you comfortable and well supported should you fall into the water. The lifejackets are designed to remain robust and reliable when used constantly, with the option of a wipe clean cover for those operating in the harshest of conditions.

The Crewfit 275N & 150N XD, Crewfit 150N HF and Crewfit 150N make up the complete Workvest range and create a comprehensive catalogue to provide the ultimate in buying flexibility. The XD lifejacket offers an innovative modular design. This allows the buyer to choose from an extensive number of lifejacket options to cater for their individual workforce requirements without the inconvenience of long lead times. A number of configurations such as cover, inflation and harness options will be available.

‘There has been an extensive amount of development in modern lifejacket design recently, improving technology and comfort. It is absolutely vital that this technology is available for the working markets, which is why we are delighted to have been able to make this range available to our commercial customers,’ says Ross Wilkinson, Managing Director for Survitec Group.

What is Fusion 3D?

The innovative Fusion 3D technology moulds to the shape of your body and sits off the neck giving the user total freedom of movement – it's so comfortable you will forget you are wearing it, ideal for a busy working environment where the priority is ensuring that employees remain safe at all times.
